## Aims and Scope

The *Journal of Contemporary Urban Affairs* is dedicated to filling the recent gap in the field of urban studies (both in the theory and practice), by examining the emerging social and economic challenges. The journal promotes original academic contributions that are cross-disciplinary to strengthen research under three main areas: *Citizenship Rights and Responsibilities*, *Territorial dynamics*, and *Urban Transformations*.

In this regard, the journal has aimed to:

- promote interdisciplinary creative contributions related to urban planning principles across the 'Arts and Humanities' and 'Social Sciences' disciplines.
- discuss the role of urban planners, urban designers and architects in enhancing the built environment.
- discuss emerging challenges and problems facing global cities within other science fields.
- develop theoretical and methodological foundations in respect of the social and economic problems of contemporary urbanizations.

-bring a scientific view to the emerging social and economic challenges.

-Provide sufficient comparisons of different challenges and solutions facing cities and societies as referred to in the aforementioned main aim of the journal.

-discover and identify innovative methods and techniques to overcome the aforementioned challenges.

Contributions are welcome from across the full range of Social Sciences and Arts and Humanities disciplines. It is expected that the contributors will provide advanced empirical and theoretical knowledge referring to contemporary urban affairs - from both positive and normative perspectives. The priority of publication is given to research articles that are specifically written for a multidisciplinary audience, with the highest quality and impact. In this regard, the journal looks for articles that are innovative and which demonstrate excellent research and development.

**Important Note:** Submitted articles must be consistent with the title and stated scope of this journal. Any submitted article out of the focus of the journal will receive a desc rejection.
